What is Sustainable Development?

Sustainable development means taking care of the Earth, and everything and everyone on it, so that we can all live well now and in the future.

How to Achieve Sustainable Development

To achieve Sustainable Development everyone needs to work together to:

- Take care of nature.
- Help each other.
- Spend money in a smart way.

From an Idea to a Plan

The Sustainable Development Strategy for 2050 is a plan that will help make Malta become a better place. The plan allows everyone to work together to make sure we have a healthy and strong environment, economy, and community.

Strategic Goals

The goals this plan aims to achieve.

Strategic Objectives

The steps that need to be taken to reach the goals.

Targets

Ways to tell if the plan is working.

The Strategic Goals

STRATEGIC GOAL 5

Making sure everyone is treated fairly and has a good quality of life

STRATEGIC GOAL 1

Moving towards an environmentally friendly economy

STRATEGIC GOAL 4

Speeding up technology and introducing other ways of getting around, and staying connected

STRATEGIC GOAL 2

Preserving our localities and cultural heritage

STRATEGIC GOAL 3

Making sure everyone is healthy and happy

Strategic Goal 1

Moving Towards an Environmentally Friendly Economy

Malta is a small Island with little space and limited natural resources. Since a lot of people now live on this island with many visiting tourists, it faces many environmental issues. This can affect the country's buildings, services, and nature, so everyone needs to work together to make Malta a better place.

The Goal will be achieved by:

- Building a strong economy that helps our planet.
- Using things wisely to keep nature and people happy.
- Taking care of nature to make sure it stays healthy and strong.
- Making sure everyone has enough healthy food, while taking care of the Earth.
- Using money in a way that helps the Earth.

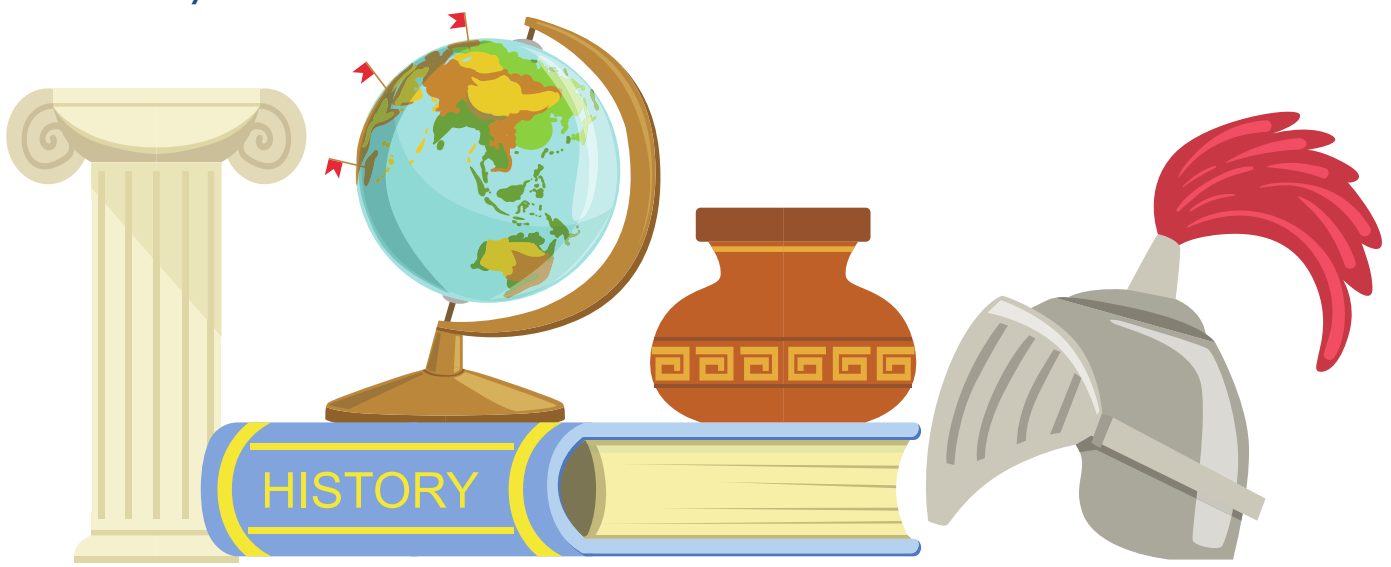

Strategic Goal 2

Preserving Our Localities and Cultural Heritage

Malta is going through many changes. There are more elderly people and more people from different countries are coming to live in Malta. To make everything work well, we all need to team up, support each other, and enjoy all the things that make us unique. This plan will make sure our special traditions are kept, while also making our towns safe and great for people to live in.

The Goal will be achieved by:

- Celebrating our culture and history.
- Planning our cities, towns and villages in a way that makes them great places to live in and also keeps them safe.
- Building strong neighbourhoods where everyone can live happily and safely, by making sure everyone has what they need.

Strategic Goal 3

Making Sure Everyone is Healthy and Happy

Staying healthy is super important! This plan will make sure that healthcare workers have all they need to keep everyone healthy. Everyone needs to understand the importance of eating healthy food and exercising regularly. This way, everyone can feel strong and happy, now and in the future!

The Goal will be achieved by:

- Helping everyone stay healthy by making our healthcare centres and hospitals better.
- Making sure everyone eats good food and plays outside to stay strong and happy.

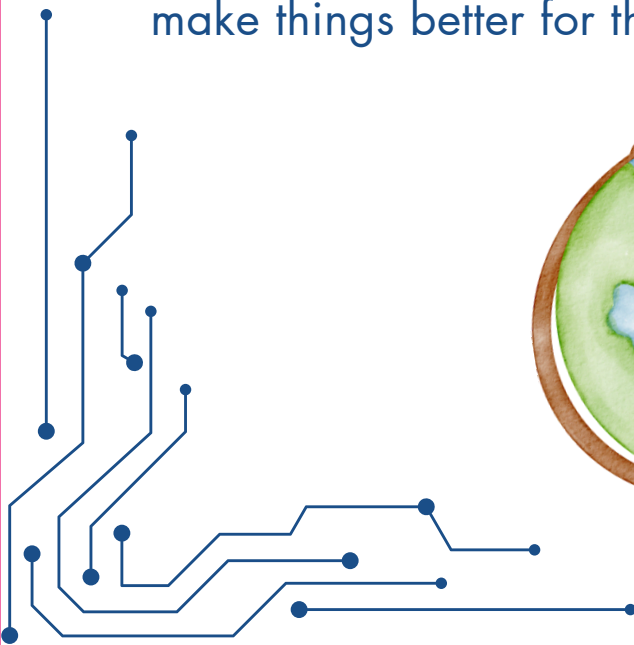

Strategic Goal 4

Speeding up Technology and Introducing Other Ways of Getting Around, and Staying Connected

The digital industries have helped Malta change a lot. This plan aims to make sure everyone can use technology safely and easily and that nobody is left behind. This plan also aims to make sure that moving around Malta is easy, with good connections between localities while respecting the environment.

The Goal will be achieved by:

- Heading towards a world where everyone knows how to use technology to make our lives better.
- Creating happy neighbourhoods with easy ways to move around and stay in touch.
- Putting money into new ideas to make things better for the future.

Strategic Goal 5

Making Sure Everyone is Treated Fairly and Has a Good Quality of Life

This plan aims to make sure that all children have a fair chance to grow up happy and healthy. This will be done by helping families going through hard times, like not having enough money or being treated unfairly. The plan also aims to make sure that all children get the support they need to be happy and successful.

The Goal will be achieved by:

- Creating rules that make things better for everyone.
- Making sure that everyone can use certain products and services, enjoy activities and be in places that are made just right for them.
- Making our neighbourhoods safe and making sure issues are solved quickly.
- Making sure schoolchildren learn things that help them get good jobs.
- Making sure everyone's voice is heard.

Conclusion

Malta's Sustainable Development Strategy for 2050 is all about making sure everyone has what they need to be happy and healthy now and in the future. It is about helping families who might be having a tough time and making sure all children get the support they need to do well in school and in life. With everyone working together, we can make Malta an even better place for everyone to live, grow, and succeed!
